SIAlliance, the global association made up of the world’s leading SIM card manufacturers, announces that over 140 attendees convened last month (8 & 9th October) for the first ever SIAlliance event to be held in Asia, organized by the SIAlliance in partnership with Informa Telecoms & Media.

The third edition of its global conference SIposium will take place in Vienna (Austria) at the Hofburg on 21st and 22nd April.

16 different operator companies and 140 delegates from 22 different countries attended over the two days to debate, discuss and network with the leading players in the SIM value chain in the region*.

Michel Canitrot, Chairman of the Board of SIAlliance said, “At SIposium – the first in a series of regional SIposium conferences, we heard nothing but optimism despite the challenging economic conditions - from industry experts from across the SIM ecosystems, from the GSMA, and ETSI to mobile operators, application developers and SIM manufactures. The SIM market is booming. It is at the centre of some of the most exciting developments within the mobile sector; from payments to identity & transport. The event itself was a phenomenal networking event, and as the SIM ecosystem expands, we expect our 2009 conferences to be even more popular, even more relevant and even more influential on the mobile communication roadmap over the next 18 months.”

Klaus Vedder, Chairman ETSI SCP: ‘If you were to stack all the SIM cards delivered in 2007 on top of on another, you would create a tower over 1976 km high! This, perhaps better than anything else, exemplifies the central role of the SIM in delivering effective communications and new mass-market value added services to consumers across the globe. But it doesn’t stop here, and, as we’ve been discussing at SIposium Asia, .technology is evolving with new specifications, protocols and, of course, developments in the contactless SIM space.”

Sergio Cozzolino, Chairman GSMA ScAG : With our remit to deliver new business opportunities to our members, the GSMA has been pushing the rapid development of an interoperable mobile contactless eco-system based on NFC technology for some time. Today, the standards for the SIM based approach are fully available and over 40 field trials have been successfully carried out. The acceptance of a global business model and availability of compatible handsets are all that stand in the way of an NFC payments explosion and it is to a broader community of ecosystem players that we must now look. And we shall be doing so at SIposium 2009 next April.”

“We were very proud to host leading operators from across the region at the event including China Mobile, Starhub, AIS, PCCW, SK Telecom, SingTel, PT Indosat, Far Eas Tone, DIGiTel Telecommunications and Celcom”, said Carolyn Dawson, Events Director at Informa. “SIposium Asia offered the perfect platform for leaders in the region to set the agenda for the future development of the SIM card industry in Asia”.

*Delegates from: China Mobile, Starhub, AIS, PCCW, SK Telecom, SingTel, PT Indosat, Far Eas Tone, DIGITel Telecommunications and Celcom|
The event was also co-located with Informa’s Mobile Device Management event.

* Breakdown of Attendees:

- Operators 25%
- General Vendors 18%
- SIM/Smart Card Manufacturers 39%
- Test Equipment Manufacturers 9%
- Handset & Network Manufacturers 9%
- C-Level & VP 30%
- Business Development 17%
- Sales & Marketing 33%
- Technical & R&D 19%
- Press/Analysts 1%

- Asia 61%
- Europe 32%
- USA 3%
- Africa 2%
- Australasia 2%

For further details on ordering the proceedings from SIMposium Asia, please contact Carolyn.dawson@informa.com, +44 (0) 20 7017 4246.

Dates for SIMposium Asia 2009 will be released shortly.

-ends-

Note to editors:

About SIMalliance: Putting the SIM at the heart of the new mobile eco-system

Over the past five years SIMalliance has become one of the world’s foremost commentators in the mobile business. By operating outside the singular commercial interests of any individual SIM card player, the association has been able to pinpoint the mission critical services on the horizon and help steer their development to meet the practical needs of the mobile market.

With SIMalliance members* now responsible for nine in every ten SIM cards sold worldwide, the collective vision of the association is uniquely placed to shape SIM developments and the impact they will have on the new generation of mobile services. From their standpoint, the challenge couldn’t be clearer for the protagonists in the mobile eco-system.

* SIMalliance members are: Eastcompeace, Gemalto, Giesecke & Devrient, Incard, Oberthur Card Systems, Prism, Sagem Orga, SanDisk, Watchdata and Wuhan Tianyu
